

# I'll Follow You

Jon McLaughlin

People tell me there will come a time  
When your heart and mine will grow cold  
No more staring at the evening sky  
Low replaces high when you're old

As long as you're around I'll follow you  
You won't ever be alone  
As long as you're around I'll follow you  
And I will be wherever you go

They say the future is our enemy  
Time eventually will set the sun  
But I believe in you and you believe in me  
How can we ever go wrong?

As long as you're around I'll follow you  
Heart is never gonna break  
As long as you're around I'll follow you  
And I will give whatever this love takes

So be patient baby  
Hold me close  
I hope you understand  
You're a beautiful woman  
And I'm just a man

So in the hours of the darkest kind  
When it's hard to find who we are  
One can stare into the other's eyes  
Be each other's light in the dark

As long as you're around I'll follow you  
You won't ever be alone  
As long as you're around I'll follow you  
I will be wherever you go
