

Can't treat me that way

Kate Earl

You're not the guy I met
And if you are only get
One chance to prove it
Baby make it count

Maybe she let you do that
Maybe some other fool had
Too many problems
To respect herself

You've got a woman who knows her worth
And ain't prepared to compromise it
You better listen you better make it better
But don't make me say
You can't treat me that way
Ooooh

Maybe it's my mistake
Simple misunderstanding
Trivial bullshit we blew into space
A common lovers rift
Uncommon words thrown like fists
Cause if you meant it
Baby it's too late

You've got a woman who knows her worth
And ain't prepared to compromise it
You better listen you better make it better
But don't make me say
You can't treat me that way
Ooooh

You better make it better
You better make it feel right
You better make it feel the way it ought to feel
You better make it better
You better make it feel good
You better do it cause you know that you should

You've got a woman who knows her worth
And ain't prepared to compromise it
You better listen you better make it better
But don't make me say
You can't treat me that way
Ooooh
