

## Each Star We See

Kathryn Williams

You left me in your house  
Full of mysteries full of silence  
I looked at all your things 'til i believed they were mine  
Sit and relax, sit and relax, sit and relax

And there's no contemplation of our situation  
Only at night do we think of our lives  
Being a blink of a greater world

But each star we see in the sky is a sun like our own beginnnin  
g to die  
And our future in their past or the other way round  
Come on see it the other way round  
Around

He can hear a pin drop from forty yards  
With the door shut  
So why can't he hear my heart  
Escape through the back door  
No, you're like a cup of water  
Swimming on a bigger sea  
You can't spill out of yourself  
Spill on the floor spill onto me

But each star we see in the sky is a sun like our own beginning  
to die  
And our future in their past or the other way round  
Come on see it the other way round  
Around

Each star we see in the sky is a sun like our own beginning to  
die  
And our future in their past or the other way round  
Come on see it the other way round

Each star we see  
In the sky  
Is a sun  
Like our own  
Beginning to die  
Each star, each star, each star  
Each star we see, each star we see  
Each star, each star, each star
