On For You

Kathryn Williams

The streetlights are on for you Shine behind your curtains A carnival of cars on wet Bring shell sounds of oceans

You light your fire
And don't look down
I watch the last light turn off in your flat
And silence the town

I'm inside the dark for you You're still shining Look at the mess i've made The path i've given you

But you light your fire
And don't look down
I watch the last light turn off in your flat
And darken the town

You light your fire
And don't look down
I watch the last light turn off in your flat
And silence the town
