

# No One Believes Me

Kid Cudi

Have you ever felt  
Something evil  
Lurking around  
The moon is full  
The streets are empty  
Shadows cover the town  
You can't call it  
You can't shake the feeling  
Be quiet not one sound  
But the wind seems to speak  
Something's here in the room with me

I know that something is wrong here  
I can feel it but no one believes me  
I know that something is strange here  
I can sense it but no one believes me

I feel like something is wrong here  
I can sense it but no one believes me  
I'm not crazy hell no I'm not loony  
I'm not insane  
Take a second  
I heard it  
I know it  
Whispers say my name  
In the room calling for me  
No ones there  
Where do I go  
Where should I run  
Theres a vibe and it's haunting  
No ones there  
Where should I go  
Where should I run
