Satellite Flight

And the story goes, a young man will come and Save the universe from the forces of evil... Take a second to adjust to the ride They say if this was a crime, it'd be federal Lately I've been feelin' invincible as I'm tryna find my way can't nothing hold me though I say Get a clue The vibes all around you Try but you can't deny when it's in your soul Let's take it where there aren't any roads Where these sucka hatin' niggas can't follow Take it to the satellite, tonight Take flight to the moon Come get in my space whip! To the satellite, tonight Take flight to the moon Take a ride! No worries (4x) Come on don't be shy Let your guard down and work it Do just what you want Anything you choose I tell ya, there's no way we could lose Have you ever seen the Earth from this view? I bet not Take it to the satellite, tonight Take flight to the moon Come get in my space whip! To the satellite, tonight Take flight to the moon Take a ride! Take a ride! (3x) And now, the vibes Heavy little thoughts get jumbled in a bundle And their tucked deep down in the back of my brain Heavy little thoughts get jumbled in a bundle And their tucked deep down in the back of my brain Heavy little thoughts get jumbled in a bundle And their tucked deep down in the back of my brain All is life and all is pain Down the hallway of my endless fate Take it to the satellite, tonight

Take flight to the satellite, tonign Take flight to the moon Come get in my space whip! To the satellite, tonight Take flight to the moon Take a ride!

Kid Cudi

(2x)

Take a ride! Come on, yea Come on, dream on Come on Dream on No worries Wicked!
