

Salty leave, salty leave  
Tell me the one about the friend you knew  
And the last good night that we toasted too  
Salty leave, stay for me

Stay for me  
We drank wine in the matinee  
And the spotlight showed what I chased away  
Stay for me

She saw my comb over her hourglass body  
She had problems with drinking milk and being school tardy  
She'll loan you her toothbrush  
She'll bartend your party

Kill me, kill me  
Called and I called but I can't get through  
He said he's on his own but his own is you  
Kill me

She saw my comb over her hourglass body  
She had problems with drinking milk and being school tardy  
She'll loan you her toothbrush  
She'll bartend your party

She saw my comb over her hourglass body  
She had problems with drinking milk and being school tardy  
She'll loan you her toothbrush  
She'll bartend your party
