

## Pick Em Out

Krayzie Bone

Get em, pick em out  
Get em, pick em out  
Get em, pick em out  
Come down, so let em know  
(4x)

Listen! Picking em out is the mission  
Learn your enemy any intention  
Don't let em get up in your mix  
Maintain your shine and mind your business  
No lines in around the suckas  
We never get down with a busta  
Unless we coming to rush ya, bust ya, crush ya  
Never did bluff ya  
One of the meanest of this  
Game ready, so we could come clean up the mess  
We are the mans, y'all niggas are not in demand  
Lyrically, I'm an assassin  
Hate to put a nigga in a casket  
Kray's getting everybody baffled  
They said, "I know he ain't say that,  
That nigga Kray bad."  
Haters, we eliminate em, never fade us  
We originators like Jordan in his prime  
I'm a keep scoring every time  
I'm like a storm up in these times  
I'm a do way more than just revive  
I'm a touch down, grab on my nuts like,  
"What the fuck now?"

Get em, pick em out  
Get em, pick em out  
Get em, pick em out  
Come down, so let em know  
(4x)

I keep all my enemies in my scope  
A nigga done play them too close  
But I got all these friends  
That means they really can be enemies, I don't know  
So I stay cautious, trying to read em  
It's making me nauseous, plus I hear too many talking  
Y'all ain't gon' bite back, but still I hear so many barking  
Pick em out, blow em up, light em up, smoke the chump  
Y'all better hunt or b-leed  
Or be glad I hid to let you breathe here  
Made it blurry, this league's thick in the game man,  
They tell me that people see Bone thugs-n-harmony  
Running this thang, man  
That's vain, man, but it's real  
Tell em we coming to claim it  
We done already made the arrangements  
This time, I don't wanna be famous  
So I'm running this shit from the basement  
Underground, I got amazing appeal  
Shut up, it's paying the bills  
What up, I'm saying it's real

I'm singing a song, but it ain't no lullaby  
More to me like a gutter vibe, Then somebody messed with the real  
So once I stick you in the veins with this  
You'll slightly restrain a little bit  
Then I hit em in the brain with a little this, some of that  
Need a hit? Wanna fly? Let me take you higher, baby (baby)

Get em, pick em out  
Get em, pick em out  
Get em, pick em out  
Come down, so let em know  
(4x)
