

# We Go Down

Krewella

If we go down  
We all go down together  
If we go down, down, down  
We all go down together

I'm backing you to the edge  
Come on and follow  
Come on and follow  
Hang your soul by a thread  
Through every tunnel  
Through every tunnel  
Take a dance with the dead  
Put reality to bed  
If your misery needs company  
Call on me

If we go down  
We all go down together  
If we go down, down, down  
We all go down together  
We are one until it's right  
Falling all as one tonight  
If we go down, down, down  
We all go down together

If we go down, down, down  
If we go down, down, down  
We all go down together

We've got nothing left to lose  
Come on and shout it  
Come on and shout it  
And when the world is doomed  
Get up and run it  
Get up and run it  
To the stars and back again  
When we fall we're hand in hand  
We're together like a symphony  
Of broken dreams

If we go down  
We all go down together  
If we go down, down, down  
We all go down together  
We are one until it's right  
Falling all as one tonight  
If we go down, down, down  
We all go down together

We are giants  
We are bigger than a monster  
Every second we are  
Taking back the power  
On the run till we get a fucking answer  
Try to hold us down  
But we're only getting stronger

If we go down, down, down  
We all go down together
