

# Shadow Of Love

Laura Branigan

Feel it tonight  
Rainin' down as cold as ice  
The air that we breathe  
Is all we share between us  
Wearing the scars  
Deep inside our desert hearts  
Tell me where did it go  
Why did love ever leave us  
Now the memories burn in my eyes  
As I remember the look of the broken hearted  
Never thought I'd be one of their own

We're standing in a shadow forever  
Her shadow's in the way of our love  
What should have been forgotten  
Forever more  
The shadow of what was  
Now I'm the one who loves you  
But I know we can't hide we can't run  
From the shadow she casts on the night  
The shadow of love

I want to believe everything that I can't see  
But the truth always lies somewhere in between us  
I can't help what I feel in the night  
Thoughts disturbing the sleep of our innocent lives  
Will these dreams ever leave us alone

We're standing in the shadow forever  
Her shadow's in the way of our love  
What should have been forgotten  
Forever more  
The shadow of what was  
Now I'm the one who loves you  
But I know we can't hide we can't run  
From the shadow she casts on the night  
The shadow of love

I want to know I'll always be  
All alone with you  
I'm the only one  
But long before we ever were  
You belonged to her  
And she still isn't gone...

Now I'm the one who loves you  
But I know we can't hide we can't run

We're standing in the shadow forever  
Her shadow's in the way of our love  
What should have been forgotten  
Forever more  
The shadow of what was...
