## **Hight Til I Die**

What's up? Lil' Rob Back on my own The way it should be The only way that it can be Let's take to the sky

Pack my pipa full of grieffa Just like my woman I could never leave her, cheat her, need her So I take a puff and another puff Exhale, then I take a breather Cause I'll take my time and do it right I know where I'll be tonight Clouding the night in my mind Feelin' fine, this is mine You wanna get high? Well come back another time When you really want to fly Cause I plan to take it to the point Where I don't know my name Won't even know where I'm at But want to come back To this place, where I sit Rather your lips will take a hit Prepare for licked, bring the pipe Or a spliff I hit is swiff God's gift, to this world, got me in a twirl In a whirl, everything I see is plural I'm just blazing, hallucinating And I can't lie, smoking crepa chocolate tie Lemon teardrops falling from my eye Take to the sky, on my natural high Till the day I die

High till I die I wanna get high, so high High on the natural high

I can smoke it on my own Never leave me alone I'm in my zone Stoned to the bone Me in the dark, sittin' in the park Forgettin' everything that hurts my heart So I spark another joan, what's the poem? Escape from reality, into a fantasy That's sexuality, feel the passion When the smoke is passin' Everlastin' type of bud When I smoke my buds Takes me to a place Smile upon my face Cause she sets me free From the things I see Let me be somebody, hear my plea It's only me, I'd rather be lonely

Roll it on my own, cause I hold my own Toke it on my own, used to think of dyin' Now I think of flyin', like I've never flown Spread my wings and fly Why lie? It's something that I can't deny Take to the sky, on my natural high Till the day I die High till I die I wanna get high, so high High on the natural high Life is like a maze Got's me in a craze So I hide away in marijuana's maze Change my evil ways Stayin' half a day Captured in the rapture Love the way she plays Got's me feelin' very loose Dizziness, love it when I feel like this I'm real like this, smokin' all this flavored shit It's time to call it quits But once again my lighter flicks And I take another puff Just can't get enough Of this happiness Smoking canibus Devotion to my potent potions What I've chosen, love it when my time is frozen Gots me in that motion, like I'm close to floatin' Takin' to the sky, when I want to fly And I'm sittin' on my cloud, like Joe Buton Don't stop now, la grafepa gone, and I'm gone It's the wicked, slicked, slide, type a guy With, it's something that you can't deny Take to the sky, on your natural high Till the day you die High till I die I wanna get high, so high High on the natural high 00000 Check this out Lil' Rob Pass me another one Feels so good, feels so good Up in my chest No stress, no stress Smoking on Mary Ooooo, I wanna get high, so high Ooooo, so high, so high, so high On the natural high
