Would You Wander

If it's really love You would follow it forever Would you wander for me? Even though you think I'm lost And you know better Would you wander for me?

This wandering is more than filling Footprints right behind me How far would you go outside The lines just to find me Letting go of anything that grounds us Would you wander for me? Even though there's darkness all around us Would you wander for me? 'cause I'd wander for you

When you see that I am gone To the edge and way beyond Would you, would you, would you wander for me?

Doesn't matter where we are We can be our northern star Far above the earth and weather Together

When you see that I am gone To the edge and way beyond Would you, would you, would you wander for me? Would you wander for me?

If it's really love you'd follow it forever Would you wander for me?
