

# Out Go the Lights

Lonestar

See the moon and the stars, how they sparkle and shine  
Baby, all around us now  
Headlights on the cars, bright neon signs  
They illuminate this town

And I see your face, look in your eyes  
Before I realize

Out go the lights, beat goes the heart  
Rush goes the blood, burning me up, taking me too far  
Baby, when you look at me, the only thing that I can see  
Is the two of us makin' love alone in the dark of the night  
Out, out, out, out go the lights

The world is turnin' around but the night is still young  
Girl, I want to take it slow  
Let a candle burn down, till our bodies are one  
Breathless in the afterglow

The way you look, the way this feels  
I just can't wait until

Out go the lights, beat goes the heart  
Rush goes the blood, burning me up, taking me too far  
Baby, when you look at me, the only thing that I can see  
Is the two of us makin' love alone in the dark of the night  
Out, out, out, out go the lights, yeah

The way you look, the way this feels  
I just can't wait until

Out go the lights, beat goes the heart  
Rush goes the blood, burning me up, taking me too far, yeah  
Baby, when you look at me, the only thing that I can see  
Is the two of us makin' love alone in the dark of the night  
Out, out, out, out go the lights, yeah

Out, out, out, out go the lights
