

Cover Up

Lucy Rose

I'm gonna come, my baby, look up at the stars tonight
I liked to be alone but then I came up to my life
To be alone is missin you
I don't know why but something makes me wanna stay all night
And I'm gonna leave when I have seen the first of morning light
To lose myself I turn it up
Turn it up, turn it up. I turn it up

You got me where you want
I watch the light go down
My mind is open
We don't look back, searching
We don't hold out
You got me where you want
I watch the light go down
My mind is open
We don't look back, searching
We don't hold out

I like to dance when I have nothing but myself to hide
I like to come till summer ends, I hate to stay inside
I hear the storm, we're up all night
I like the work flow, I'm not the one to break the ice
We got two lives to make up for all the time we have lost
To be for real I cover up
Cover up, cover up. I cover up

You got me where you want
I watch the light go down
My mind is open
We don't look back, searching
We don't hold out
You got me where you want
I watch the light go down
My mind is open
We don't look back, searching
We don't hold out

(I'm alive, I'm alive, I'm alive)
Say you want to be there
(I'm alive, I'm alive, I'm alive)
Say you want to be there
(I'm alive, I'm alive, I'm alive)
Say you want to be there
(I'm alive, I'm alive, I'm alive)

You got me where you want
I watch the light go down
My mind is open
We don't look back, searching
We don't hold out
You got me where you want
I watch the light go down
My mind is open
We don't look back, searching
We don't hold out

We don't hold out
We don't hold out
