Ha-ha-ha-ha-ha-ha Ha-ha-ha-ha-ha-ha Ha-ha-ha-ha-ha-ha Ha-ha-ha-ha-ha-ha Ha-ha-ha-ha-ha

You hide your skin like you're shy or there's something wrong You stylish when you got nothin' on, yeah And all I do is make these f**kin' songs So finally I made a f**kin' song And now she comin' closer Hope she crawls, she wanna jump my bones You want it don't ya? I was a soldier, now I'm comin' home The war is over Kick down the door, I hold your bends, you never break You need to smell your sweet aroma See I knows you smell like cinnamon Kissin' your lips I lick my fingertips and get your clitoris in the mix My dick on business trips My tongue twistin' is ticklin' just a little bit I'm swimmin' inside of your skin like a river In the Caribbean

It's okay that you like it babe (I like it baby)
And it's alright that you misbehave
It's okay to be this way (this way)
To live this way baby baby (ooh baby)
Chillin' with the AC

That's just the way that we are
You and me, super freaks here we are
I'm takin' care of each and every part
I opened up your legs and go straight for your heart

Said I'm too divine, I'm too divine yeah, too divine You are mine, baby, I'm Mr. Superfly I'm Mr. Blew your, blew your mind hot as June, July I wanna make you wonderful Girl you my painting You my art installation Gonna f**k you, put you on the wall All I wanna do is show you off I want to put you on Why would I ever blow you off?

Right now let's go get lost
Just I've been way too hot for way too long
I'm so exhausted
Whether that's your mind or line we still get crossed
First your name is gone
Never understand until you have to stand alone
Can I have a hand to hold?
A Band-Aid for my damaged soul, I paint the planet gold
I swear I'm Michelangelo, I don't understand you so
They didn't want a man when he was down and broke

But now they know me and what I don't need No Six, no Beamers, no Benz

That's just the way that we are
You and me, swimming freaks here we are
I'm takin' care of each and every part
I opened up your legs and go straight for your heart
