Bite the Bullet

Machine Head

I understand your every fear Your every pain your every tear With every struggle you conquer Turn heart to steel And will to iron

You want more? You'll get it Determined, ferocious Grit down and bite the bullet Dare to unbind Smash and redefine

The hate you feel is nothing more Than love you feel to win this war The battle that rages inside you With bloodlust You must unchain your shackles

You want more? You'll get it Determined, ferocious Grit down and bite the bullet Dare to unbind Smash and redefine

Lion heart Never give in Unsatisfy every weakness

You want more? You'll get it Determined, ferocious Grit down and bite the bullet Dare to unbind Smash and redefine
