No More

Madeleine Peyroux

You ain't gonna bother me No more Nohow Love just goes so far No more Woke up this morining and found I didn't care for you No more Not now

Never felt so good before You're down to my size It's over and done So honey, step down from your throne That look in your eyes Don't bother me none Can take you or leave you alone

From my window Skys ain't grey No more Not now Here's the day That I've been waiting for Got only one heart One heart with no spares Must save it for loving Somebody who cares So you ain't gonna bother me No more, no more

Got only one heart One heart with no spares Must save it for loving Somebody who cares So you ain't gonna bother me No more, no more
