

Dream About You

Magnum

I never though I'd feel so helpless
Something's happening to me
'Cause every night feels like the longest
And every hour's eternity

'Cause I can't have you like I wanted to
I got nothing without you

So now I dream about you
I got my arms around you
Dream about you
Ain't nothing else I can do
I want to be where you are
No matter near or how far
So now I dream about you

I'd never thought I'd feel defenceless
Nothing mattered much to me
The sun goes down, I get restless
All those same old memories

I know your touch
You're look, you're every word
Can you hear me, baby?
I want you back again into my world

I want to dream about you all my life
No matter near or far
I promise, promise I'll be where you are
I'm going to dream about you
