

## Inside Your Head

Magnum

Lived your life a working man  
Every day just the same  
Passing time the best you can  
Running home through the rain

Now it's all gone  
But carry on

You sit alone into the night  
And think about what could be  
You missed the chance you had in life  
A father to your family

It's not watch it seems  
When you've got dreams

Inside your head, no one sees  
They fear to tread  
Inside your head, you're still free  
It must be said

Every word you used to say  
Answers to everything  
Your old world of yesterday  
There's so much you could bring

While you still breathe  
You will believe

No one has done it all  
Even today, big or the small  
And when people might call  
Don't run away, you just stand tall
