

## Suicide Gene

Man Must Die

Here  
Stand helpless, alone in this world  
Panic stricken as I hear the key in the door  
His world a place of failure and rage  
My world of mental and physical pain  
I've tried to understand through time  
Why these images of my death  
Consume my mind  
I can't face up  
Can't block it out  
I must move on now  
And destroy this worthless life  
Smothered, silenced  
My visions of death now engraved  
I have been blessed with the suicide gene  
On your knees again  
Just another pointless waste  
Of everybodies time  
OBEY!  
Suicide  
Nobody gave a fuck to see the signs  
Suicide  
Nobody gives a fuck until you die  
You'll grace the side of my grave  
With a look on your face  
Like you never expected this  
I still bare the scars on my face  
Where you used your fist  
How could you do this to me?  
I was your only son  
This pain will plague you forever a constant reminder  
Of what you are  
A piece of shit  
That beat his kid  
I hope you die a thousand times  
Smothered, silenced  
My visions of death now engraved  
I have been blessed with the suicide gene  
(On your knees again)  
This pain will plague you forever  
And it won't end  
Suicide  
Nobody gave a fuck to see the signs  
Suicide  
Nobody thought to question why  
Suicide
