Can't Find The Way

Mary Gauthier

This is not my street This is not my house That is not my bed This is not my town Another day another night Another night another day I wanna go home I canOt find the way

The levee broke the water came Went all the way up to my roof I crawled up there and cried What else could I could do? Another day another night Another night another day I wanna go home I canDt find the way

A boat brought me to I-10 I sat there three days, maybe four Thousands stranded on the interstate Every hour boats brought more Another day another night Another night another day We wanna go home We can I find the way

With nothing but our dreams And memories of who wellve been Scattered forth like seeds At the mercy of the wind Another day another night Another night another day We wanna go home We canlt find the way

Another day another night Another night another day We wanna go home We canDt find the way
