## Raygun

## **Matthew Good Band**

Shoot me with your raygun Full of holes so the day light can get to what's dark I remain trapped inside your body The vice above your head The hole inside your heart Shoot me with your raygun Full of night and daylight savings Armour me with futile aspirations The knives of many nations A shovel and some dirt

Digging down you'll find you're old inside Shoot me with your raygun Full of holes of indignation We've never been there before

Take me with you To the place where everything is unsaid I remain trapped inside my body Wishing it was over Shoot me with your raygun Through the night So the daylight finds you Wishing it was over

Digging down you'll find you're old inside Shoot me with your raygun Full of holes of indignation We've never been there before You and me
