## **Follow The Leader**

## **Matthew Ryan**

It's follow the leader, baby That's how it's gonna be If you ever really wanna get lost Then follow me

Follow the leader

We're in a solar system Together and alone The bills, the smoke, the furniture The happy home

Now you can follow your gut Or you can follow the past But if you knew an eclipse was coming

Why'd you even ask?

Follow the leader

(There's brighter days ahead I've seen them on tv Word is there's something big Hidden up their sleeve)

So maybe it gets quiet And maybe it gets numb At least then there's still something To share with someone

Follow the leader
