Well you sent me running

For cover, deep in those dark and lonely hallways of my heart

And there were problems

You said there was something wrong with me

And they were deep-seated they were deep-rooted

I must've pushed 'em away I pushed 'em away

So you left with the impression that if I could just clear my h

ead
You'd be back with me on day
But now you walk the roads with a rose in your teeth
Walking arm and arm with him it's hard to believe that I'm the

Thing from your mind

furthest

Well if those dark clouds haven't come rolling in yet Come on baby you know better than that In life there's a lot of high grass and deep wet sane You just trudge through the best that you can

And remember
To watch your step
You can take it on the run now babe
Cause you'll throw it away, you'll throw it away
You can take it on the run now babe
Cause you'll throw it away, you'll throw it away
You can take it on the run now babe
Cause you'll throw it away
Just like you threw me away

Well if those dark clouds haven't come rolling in yet Come on baby you know better than that In life there's a lot of high grass and deep wet sane You just trudge through the best that you can

And remember
To watch your step
You can take it on the run now babe
Cause you'll throw it away, you'll throw it away
You can take it on the run now babe
Cause you'll throw it away, you'll throw it away
You can take it on the run now babe
Cause you're gonna throw him away
Just like you threw me away
