Love Our Children Forever

Meat Puppets

Some come away with an armload of hay
One sails to market on her sea
Some like to say they'll do it yesterday
One starts his car without a key

Some come to play And they throw it all away Love our children forever Love our children forever

Some cut the trees and stack them in the sand One shoots up into the sky
Some do what they please
The world's at their command

Some come to nothing by and by Some come to play And they throw it all away

Love our children forever Love our children forever
