

# Black Lights

Medina

It's true what they said I did,  
it's true what you think you heard,  
but I'm not ashamed of it,  
I got no alibi for the worst.  
I know that I did the crimes,  
yes I'm guilty and crucified  
and I know you'll be judging me  
but there's nothing here to hide.

Because I've seen the sun rise a thousand times,  
I must confess not always sober I,  
not gon' pretend that I didn't try it all. It ain't no cover up.

I guess I live like there's no tomorrow,  
the nights are flashing by in front of me,  
you know I live like there's no tomorrow,  
cause in the blackest lights  
there always be a ray in the darkness,  
I'm radioactive,  
whenever I'm fading I glow in the black lights,  
my heart is igniting, it's burning inside me.  
I've learn from the black lights to glow in the black lights.

As true as they said it is,  
no I can feel no remorse,  
cause an angel will fall from this,  
no denying anymore.

Because I've seen the sun rise a thousand times,  
I must confess not always sober I,  
not gon' pretend that I didn't try it all.  
It ain't no cover up.

I'll glow in the black lights.  
I'll glow in the black lights.

A ray in the darkness,  
I'm radioactive,  
whenever I'm fading I glow in the black lights,  
my heart is igniting, it's burning inside  
I've learn from the black lights.

I guess I live like there's no tomorrow,  
the nights are flashing by in front of me,  
you know I live like there's no tomorrow,  
cause in the blackest light  
there always be a ray in the darkness,  
I'm radioactive,  
whenever I'm fading I glow in the black lights,  
my heart is igniting, it's burning inside me.  
I've learn from the black lights to glow in the black lights.

I'll glow in the black lights.  
I'll glow in the black lights.

A ray in the darkness,  
I'm radioactive,

whenever I'm fading I glow in the black lights,  
my heart is igniting, it's burning inside me.  
I've learn from the black lights to glow in the black lights.
