White Gold

Piss-poor, ridin' high Sun-bathin' fire-side We're here for the porn Of the sirloin

Get your T-bone, let your backbone slide Tunnel and sky collide Lose friends to the air waves And the airlines

I wanna make it right Some future in my eyes bright Hush, don't explain When you water down my name

I'll be up too late Call me when you get Better at your game You haven't beat me yet

The waitress, the actress Got the skin and the bones With the hairbrush and an air brush She'd be white gold

She asked the piss-poor "Why you lookin' for that party in the sky? It's just a movie about a movie Too old to die"

But I'm gonna make it right Future in my eyes bright Hush, don't explain When you water down my name

I'll be up too late Call me when you get Better at your game You haven't beat me yet Though my vision is strainin'

I'm gonna make it right Some future in my eyes bright Hush, don't explain When you water down my name

I'll be up too late Call me when you get Better at your game You haven't beat me yet
