James Bond Theme

Now let it lift you, oh

One love will, one love will One love can take you make you feel alive and whole

Why give it up? Why tear it up?

One love will, my love will My love will make you feel alive enough to let go

Oh, the death row Once again you feel like the brothers know Once again, back is the incredible The rhyme animal, the unforgettable D

Public enemy number one Five-oh said, "Freeze" and I got numb Can't I tell 'em that I really never had a gun But the wax that the terminator X spun now

So soft, so alive My dear, so good So close, so real

This love Woah love, wanna give it up Let's turn it loose

Bond, James Bond

Moby
