

Why can't you see
That this is how our love was meant to be
I'll never understand why your putting me down
Ruining everything
And when I'm looking into your eyes
I see someone I've grown to despise
There isn't any point in me hanging around
Living the life I live

I told you once but you misunderstood
I never gave up though I did all I could
I can't believe what you're putting me through
I did all I had to do

Just when it's out of reach
Everybody needs to love
But that's how it's got to be
What everybody wants is love

Don't turn your back on me
Everybody's needs to love
That's how it's got to be
it's too late now and you've got to be free

Hard to believe
The way you always try to deceive
There isn't any point in me hanging around
I'm sick of the way I feel

Am I the only one who regrets
The things you always try to forget
Why is it always life ends up dragging you down
Coloring everything

I told you once but you misunderstood
I never gave up though I did all I could
I can't believe what you're putting me through
I did all I had to do

Just when it's out of reach
Everybody needs to love
But that's how it's got to be
What everybody wants is love

Don't turn your back on me
Everybody's needs to love
That's how it's got to be
it's too late now and you've got to be free
