

# I Live Behind the Clouds

Monster Magnet

I've got a feeling that no one cares,  
'bout all that confetti I throw in the air  
Nothing's important yet everything is  
If there ain't no photo I just don't exist  
And the winds blow and the sky looks cool  
So I make my home in the clouds

I see the oceans, the mountains, the plains  
The rats and the suckers, the strong and the lame  
Sometimes I dream about flying on down  
Falling in love and life on the ground  
And the winds blow and the sun comes up  
And I stay behind the clouds  
Yes I live behind the clouds

Raise Surya to burn off the soil  
Make it safe for my eyes  
I'd pay good money just to get proved wrong  
for once in my goddamned life  
Pull me in, drag me down into your ocean of love  
My wings are ragged and my soul is gone  
So tired of floating above

Sing to me baby your sweetain  
I feel I'm coming apart in this rain  
That's all I need if that's all I hear  
Some beautiful music as I disappear  
And the winds blow and the sun goes down  
And I stay behind the clouds  
Yes I stay behind the clouds  
Yeah I live behind the clouds
