

It doesn't make us strong
It doesn't make us weak
Tongue tied disservice
Like shy pre-teens
I could only breathe
Live to believe
I'm alone
It didn't come easy I'm glad it was hard
Worth the wait to give you my heart

Big teeth small kiss
I turn to wax and melt like this
Melt like this

I found you in pieces you'd been torn apart
A million one reasons to end before you start
But deep down I knew
No matter what in the end, it'd be me and you

Big teeth small kiss
I turn to wax and melt like this
Melt like this

Lavender Haze
Djarum vanilla
Turkish jade
You and me
We have it made
We have it made

Caress my knees with your tongue
Teeth on my waist I come undone
It's those hours in the night just before a light
Run your hand down my spine
We kiss the dusk goodnight
Goodnight
