

# Radioactive Force

## Municipal Waste

Our cannons have more strength than yours  
Our weapons take more lives than yours  
Our soldiers are obsessed with gore

Accepting of the hand were dealt  
We kill until there's nothing left  
And we just want you to melt

Strength pride obsessed  
We kill until there's nothing left  
And when they're dead your ass is next!

We spit our beer upon your corpse  
Without the slightest of remorse  
With radioactive force!

No resistance to our radioactive force  
We march until everything is scorched

Tired of the things you've done  
Time is up no place to run  
Streets run red with you blood

Fueled by our toxic thirst  
You haven't even seen the worst  
Decimating every church

This town melts down  
So does everything around  
Victory's a mushroom cloud

And when it's done and nothings left  
And your whole planet stinks of death  
That's when we'll finally take a rest

The decimation of civilization is coming today  
All is dead: punish the earth, march on the graves  
Total destruction  
Breathe in the air

Two worlds collide  
All devastation through radiation  
Everyone dies!

Our cannons have more strength than yours  
Our weapons take more lives than yours  
Our soldiers are obsessed with gore

We spit our beer upon your corpse  
Without the slightest of remorse  
With radioactive force!

No resistance to our radioactive force  
We march until everything is scorched

The decimation of civilization is coming today  
All is dead: punish the earth, march on the graves

Total destruction  
Breathe in the air
