

The Park

Mustard Plug

Last call
One second left
A minute maybe more
Too many complications I've forgotten what it's for
My own consistency has kept me straight in line
I know I've often come here I just can't recall the time when
You told me to go that way
When I get paid you told me that the right way
Was always one more long step further from your last
Take me to the park
Don't leave me after dark
'cause I can't find my way around this town
Even though I've been here
I can't remember last year
Even though I know I've been around
Another turn
Another fork stuck in the road
I read the rules but don't remember all the codes
I took my chances now there is no helping me
I hope you leave a message somewhere
That I'll surely see
You told me to go that way
When I get paid you told me that the right way
Was always one more long step further from your last
Take me to the park
Don't leave me after dark
'Cause I can't find my way around this town
Even though I've been here
I can't remember last year
Even though I know I've been around
I can't remember why I tried
I only hope to say goodbye
