

## Goodnite, Dr. Death

My Chemical Romance

Alright, Children  
The lights are out and the party's over  
It's time for me: Doctor D  
To start running and say goodbye for a little while  
And I know you're gonna miss me  
So I'll leave you with this  
You know that big ball of radiation we call the sun?  
Well it'll burst you into flames  
If you stay in one place too long  
That is if the static don't get you first  
So remember even if you're dusted  
You may be gone  
But out here in the desert  
Your shadow lives on without you  
This is Dr. Death Defying  
Signing off
