## **Steam Engine**

## My Morning Jacket

So, I do believe None of this is physical, at least not to me So, I do believe That anywhere it goes, it's always with me

It's not the dream that makes you weak
It's not the night that makes you sleep
But it's a voice and it's a choice
To call you out or stay at home

So, I do believe None of this is physical, least not to me So, I do believe That anywhere it goes, it's always with me

It's not the beast, it's not the sheets So soft and warm all over me But it's a touch you need so much To move around on this green earth, ahh

Take your money and your drugs Take your money and your drugs To anyone who wondered What old Jebus meant to me

Take him out to go diving
In Red Patoka sea
The brain melts in the twilight
With the boar and moving trees

Your skin looks good in moonlight And goddamn those shaky knees The fact that my heart's beating Is all the proof you need

I believe I believe I believe

. . .
