

Scars

Natalie Imbruglia

Is this part of the process
Cannot find another way
Way around the pain

There's a place that I'm heading
I need to know, are you coming
Coming there with me

Because you left me here in *bedlam* and
You said I'll work it out I promise
I don't know how we got here in the first place

I climb the walls
You hit the bars
I am from Venus
You are from Mars
You got your brand new friends
And I got a broken heart

Doesn't matter who we are
Everyone has their scars
Everyone has their scars

Should I try not to notice
How do I know where to run when it's *calling* me to death

Because you left me here in *bedlam* and
You said I'll work it out I promise
I don't know how we got here in the first place

I climb the walls
You hit the bars
I am from Venus
You are from Mars
You got your brand new friends
And I got a broken heart

Doesn't matter who we are
Everyone has their scars
Everyone has their scars

What could be so bad
It's taken you so far
All the time I don't know who you are

I climb the walls
You hit the bars
You got your brand new friends
And I got a broken heart

Doesn't matter who we are
Everyone has their scars
