

Double Or Nothing

Nine Lashes

It's us and them
And here we make our stand
We will define the line that saves us from the others
They're coming for
The weak and weary one to fall
So wonderful that our hearts are intertwined

And how do we know
If we are safe from it all
I don't know
Let's make it double or nothing to gain
When out of control
It's your day
Take a hold, let it go
Let's make it double or nothing to gain

Beneath one name
We were the ones to blame
And by design he came to my surprise
Now we're saving the girl
Changing the world 'til our words ignite
Telling the tale of the one made just to die

And how do we know
If we are safe from it all
I don't know
Let's make it double or nothing to gain
When out of control
It's your day
Take a hold, let it go
Let's make it double or nothing to gain

And how do we know
If we are safe from it all
I don't know
Let's make it double or nothing to gain
When out of control
It's your day
Take a hold, let it go
Let's make it double or nothing to gain
