

Renaissance Girls

Oh Land

I can be an engine buzzing like a bee, I'm a real independent
Doing the laundry and planning for the future
It's the nature of a renaissance girl
I can be your darling cooking you dinner and soothing your heartache
Having three kids and still remain a virgin
It's my version of a renaissance girl

Lift me, lift me up where the air is thin and my mind will take
off
Pull me, pull me down where my love is pure and my feet are on
ground

Come along, come, come along, we can be your renaissance girls
Come along, come, come along, move forward, move forward
Come along, come, come along, tough like rocks and sweet like pearls
Come along, come, come along, we can be your renaissance girls

I can be an artist sculpting your face like you always wanted
Making you believe it's just how I saw it
It's logic for a renaissance girl
I can be impressed by all the things you know, I'm fan, I'm obsessed now
Knitting you a sweater while I drive in your fast car
It's mastered by a renaissance girl

I'll release my money you can be my backbone
I call you honey you can cry on my shoulder
Let it all breath, I got a degree in psychology

Lift me, lift me up where the air is thin and my mind will take
off
Pull me, pull me down where my love is pure and my feet are on
ground

Come along, come, come along, we can be your renaissance girls
Come along, come, come along, move forward, move forward
Come along, come, come along, tough like rocks and sweet like pearls
Come along, come, come along we can be your renaissance girls

Lift me, lift me up where the air is thin
Pull me, pull me down where my love is pure and my feet are on
ground

Come along, come, come along, we can be your renaissance girls
Come along, come, come along, move forward, move forward

Come along, come, come along, tough like rocks and sweet like pearls

Come along, come, come along we can be your renaissance girls
