Missing Persons 1 & 2

OneRepublic

Used to come around here every day Now you're breakin Used to be the one that is not ashamed Now you shamin Lost in all the wars we fought Never saw a road Now that i think about you in the skies I'd turn my row And i wonder where you are Now I wonder where you.. Are [ooooh]

Take yourself down Pick yourself up Everything changed when you got along 7 point 1 took it all down Suddenly you can't even be found I said all night long

Missing person's in the window Staring at me Saying things I cant hear A missing person's in the window Staring at me Haven't seen them in years

(Instrumental)

First things first Second in command Right as i'm trying to change my plan Second gonna die Oh he cant breathe Everybody's staring straight at me You spend it all chasing those lies I dont really wanna take that chance I dont really wanna do that dance I dont really wanna do that dance I dont know what to do till you say Oh i dont wanna let you go But i cant keep holding on Skies of silver, Stars of gold And now you know just what you like

So far this love is all i have So far this hurt is all i have

Missing person at the window Missing person at the window A missing person at the window Missing person at the window I wonder where you are I wonder where you are I wonder where you are Wonder where you...
