

This Time

Oomph!

I love you, I need you
I raise you, I feed you
I know that you'll be the one who will cure me
The one who will lead me
Through darkness that blinds me

I want you, I soothe you
I fix you, I use you

I know that you'll be the one to begin me
'Cause this time I know I'm in love

I smell you, I need you
I reach you, I feed you

I know that you'll be the one who will save me
The one who will spare me
From life that just kills me

I touch you, I take you
I crush you, I rape you

I know that you'll be the one to renew me
'Cause this time I swear I'm in love

Is there somethin' that I could hold you?
Is there somethin' that I could show you?
Is there somethin' that I could give you?
Is there somethin' that makes me feel like you?

Is there somethin' that I could hold you
Is there somethin' that I could show you
Is there somethin' that I could give you?
Is there somethin' that makes me feel like you?

Is there somethin' that I could take you
Is there somethin' that I could break you?
Is there somethin' that I could give you?
Is there somethin' that makes me be with you?

This time I feel true love
This time I feel love
This time I feel true love
This time I feel love

I know that you'll be the one to un-do me
'Cause this time I know its real love
Is there somethin' that I could hold you?
Is there somethin' that I could show you?
Is there somethin' that I could give you?
Is there somethin' that makes me breathe like you?

Is there somethin' that I could hold you?
Is there somethin' that I could show you?
Is there somethin' that I could give you?
Is there somethin' that makes me breathe like you?

Is there somethin' that I could take you?
Is there somethin' that I could break you?
Is there somethin' that I could give you?
Is there somethin' that makes me be like you?
