## **Turn The Knife**

## Oomph!

I'm sinking deeper in the black of this hole I can't remember if there once was my soul I wanna know if i'm still able to feel and this why you got to give me the steel

You turn the knife I come alive come on now gimme the knife come on now get me alive

So whet the blade and get it under my skin I hope you cut away the sore of my sin I can't believe I want you holding me tight now that the steel is coming one with my side

Always wanted to believe in your love sometimes I thought that you were sent from above and now I know you've got the power to heal and this is why you got to give me the steel
