

# Benighted

Opeth

Come into this night  
Here we'll be gone  
So far away  
From our weak and crumbling lives  
Come into this night  
When days are done  
Lost and astray  
In what's vanished from your eyes

What came and distorted your sight  
Saw you benighted by your fright

Come into this night  
Your plight alone  
Carry your weight  
You are flawed as all of us  
Come into this night  
Your only home  
It's never too late  
To repent, suffer the loss

What came and distorted your sight  
Saw you benighted by your fright

What came and distorted your sight  
Saw you benighted by your fright

Come into this night  
When you're able  
To undo your deeds  
And atone with your lonely soul  
Once you're into this night  
All minds are stable  
Forget all your needs  
Lose the grip of all control
