

## Weather

## Other Lives

I am the one that's calling inside of your brain I am the one that makes you feel all the shame Never mind my name

We don't wanna believe that the world can still move on We don't wanna believe that the sun can still shine on

If we gonna kill each other how we gonna live forever? If we gonna live forever how we gonna kill each other?

I am the one that's calling inside of your brain I am the one that makes you feel all the shame Never mind my name

We don't wanna believe that the world can still move on We don't wanna believe that the sun can still shine on
