

# It's Not Me

Paul Stanley

You tell me what you want  
And you try to tell me what I need  
But your smile can never sell me  
What I don't believe  
Now the gun is in your hand  
And all the words are on your tongue

They gave you everything when you were young  
You threw it all away when you were done  
You pray you found that chosen someone

It's not me, I don't wanna be  
I'm not the cure, I'm not your savior  
Now there's danger every second that you breathe  
It's not me, I don't wanna be  
And now the truth cuts like a razor  
Your're gonna have to save yourself  
You better look for someone else

Your turn the world your way  
And you lose the truth within your lies  
But the feeling that you crave  
Money never guys  
All the warnings come too late  
And your body starts to scream  
And if you think you see me in your dreams

It's not me, I don't wanna be  
I'm not the cure, I'm not your savior  
Now there's danger every second that you breathe  
It's not, I don't wanna be  
And now the truth cuts like a razor  
You better look for someone else

When you run in a world full of trouble  
Trouble always runs to you anyway  
Now the damage is done  
And you want me to stay  
But it's not me

They gave you everything when you were young  
Your threw it all away when you were done  
You pray you found that chosen someone

But it's not me, I don't wanna be  
I'm not the cure, I'm not your savior  
It's not me, I don't wanna be  
And now the truth cuts like a razor

No, it's not me, I don't wanna be  
I'm not the cure, I'm not your savior  
You're gonna have to save yourself  
You better look for someone else  
'Cause it's not me
