

# Chariots Of The Gods

Pegazus

We are not alone  
On this earth that we call home  
Flying across the skies at night  
Are silver beams of light  
Visitors from afar  
From a distant shining star  
Travel across the universe  
To see who we are.

The sun revolves around us  
We revolve around the sun  
The solar system is endless  
And who really knows, just where it ends?  
Man has walked onto the moon  
We have launched rockets into space  
Stargazing for many centuries  
But we still don't know everything

Chariots of the Gods  
They've been watching the earth  
Chariots of the Gods  
From a distant universe  
Chariots of the Gods  
We can't escape their watching eyes  
Solar system angels  
They're watching you and I

Back in the days of the Pharaohs  
They saw many visions in the sky  
In the night skies they were shining  
Gods they saw in silver chariots  
Flying high over the pyramids  
Solar system angels light up the night  
The Pharaohs raise their hands to the heavens  
Worshipping the silver god

Chariots of the Gods  
They've been watching the earth  
Chariots of the Gods  
From a distant universe  
Chariots of the Gods  
We can't escape their watching eyes  
Solar system angels  
They're watching you and I  
Watching you and I.

Now we still feel their presence  
We have seen them with our own eyes  
Coming down to earth and watching us  
Why it is, we may never know  
Too many sightings of aliens  
Governments deny that they exist  
Hiding facts from the rest of us  
Why can't the truth just be known?

Chariots of the Gods  
They've been watching the earth

Chariots of the Gods  
From a distant universe  
Chariots of the Gods  
We can't escape their watching eyes  
Solar system angels  
They're watching you and I

Watching you and I.
