## **Involutive Star**

Involutive star, you're shining Like a fire on the sea The crowning of the Infant Queen And the beast is on its knees

You're living in a Christmas song That will never last too long The chimes are ringing through the night And the word has become light My love

Involutive star, you're shining Like a diamond on the breeze The way you walk and the way you talk Like in a slow-mo silent film

You're living in a winter song That keeps the world from turning on The chimes are ringing through the dawn And the sun will never come

Involutive star, you're drifting Through the city's combat zone Bullets whiz through your sheltered life And they freeze right at your throne

Involutive star, have your fun with me Then we'll get back to the sea Involutive star, dress in lights for me For the dark is running free My love

Involutive star, you're calling Like a banshee on the wind For the walls of sound are closing on With the coming of the spring

You're living in a winter song That keeps the world from turning on But they're shutting off the world today And there's still the bill to pay

Involutive star, have your fun with me Involutive star, dress in lights for me Involutive star, have your fun with me Involutive star, dress in lights for me

Involutive star, have your fun with me Involutive star, dress in lights for me Involutive star, have some fun with me Involutive star, dress in lights for me
