From the Heart Down

The Pretenders

We watch each other Even when we sleep For some small protection It's a promise we keep

Love is hard to define It runs in circles Round the mind But a circle Ain't a circle If it's not complete

Oh love me from the heart down If it hurts or if it's bliss Love me from the heart down Reveal me with a kiss My senses must compete With a brain that let's me down Down...down

We satisfy each other But the hunger still remains You sink into my flesh like a knife When day comes to an end We take off all our clothes And stand naked face to face With real life

Oh love me from the heart down Get me on the floor Love me from the heart down Go under And then come back for more Analytical patter Gives love the run around, around You can't hold a theory Won't you love me From the heart down

We misconstrue intentions When there's distance in-between Longing hurts the teeth Like something sweet When you're not here with me You become a memory This aching feels Like some kind of defeat

Oh love me from the heart down Get me on the phone Love me from the heart down Lie and say you're coming home True confessions need The make-up of a clown Smiles are deceiving Won't you love me Tišteno me from the heart down
