

Do your two heads  
Hold up your two faces  
Is it this town that brings you down  
My friends  
Is it this town that brings you down  
My friends  
Is it this town that brings you down

Keep your head on straight  
And aim for those bigtime lights  
Is it those flames from hell that bring  
You down my friends

Is it those flame that bring you down  
My friends  
Is it those flame that bring you down  
My friends  
Is it those flame that bring you down

Never at a time change  
Never had a facelift  
My heads not on straight  
But I can see through you today  
Been through a timewarp  
LSD and cold hearts  
But I can see through you you today  
But I can see through you today

Is it those flame that bring you down  
My friends  
Is it those flame that bring you down  
My friends  
Is it those flame that bring you down

Is it those flame that bring you down  
My friends  
Is it those flame that bring you down  
My friends  
Is it those flame that bring you down
