

Psychedelic suicide trip it and you'll never die
You see sometimes I can not believe the things that acid does to
me
Chemicals inside my brain, laughter easing all my pain
Once thing I cannot believe the things that this world does to
me
Does to me

Somebody help me I'm fallin' apart at the seams
Only salvation is a drug called L.S.D.

Psychedelic suicide I hate that's dwelling deep inside
Look inside and you will see there's no such thing as make believe
Chemicals inside my brain assuring me that I'm insane
One thing I cannot believe the things that this world does to me
Does to me

Somebody help me, I'm fallin' apart at the seams
Only salvation is a drug called L.S.D.

I can do anything
When I dose, I can do anything
When I dose, I can do anything
When I dose, I can do nothing

I can do anything
When I dose, I can do anything
When I dose, I can do anything
When I dose, I can do nothing

Somebody help me, I'm fallin' apart at the seams, at the seams
Somebody help me, I'm fallin' apart at the seams
Only salvation is a drug called L.S.D.

Underneath the skin, lies your misery
Somebody help me, I'm fallin' apart at the seams
At the seams
At the seams
At the seams
At the seams
