```
Cause I feel safe when you're near me
And I can hold you completely
Although you constantly hurt me
And we fight
And we cry
And we tell the same lies about love
And we cling to each other shoulder to shoulder against the world
So I'm gonna drag you down
Whilst you drag me down
And I'm gonna shout at you
Whilst you shout at me until we realize that real love is free free
And I get a kick when you worry
That you are just no good for me
And I feel weak watching you plead
And we fight
And we crv
And we tell the same lies about love
And we cling to each other shoulder to shoulder against this world
So I'm gonna drag you down
Whilst you drag me down
And I'm gonna shout at you
Whilst you shout at me until we realize that real love is free free
Don't be my downfall
Don't be my downfall
Don't be my downfall
Don't be my downfall
Let's leave it alone
We can work it out
Find our way
Forget the past
Cause I love you and you love me
So let's crawl free
So I'm not gonna pull you down
Whilst you pull me down
And I'm not gonna shout at you
Whilst you shout at me because I've realized that real love is free
